

# Using the Data Projector with a Laptop

## Location

### Projector

- Take projector with cables out of podium.
- Projector goes on the lower shelf of the podium.
- ✓ Remember to connect the projector & laptop to an electrical outlet.

### Laptop

- Take the laptop out of the cart
- Laptop goes on one of the top shelves of the podium

## Connection

1. Plug the USB cord into a USB port on the laptop.
2. Plug the blue end of this cord into the blue port on the back of the laptop.
3. Insert the large black cord into the “M1 Signal In” port on the back of the projector.

## Display

1. Press the power button on the laptop and wait for it to boot up.
2. After the computer boots up, press the power button on the projector.
3. If the computer view is not projected, press Fn + F8 on the laptop keyboard.

Remember to connect the speakers to the laptop if you are going to need sound.

\* If no image displays, press SOURCE button on the projector remote
